

----- ASTROVISION SOFTWARE -----

Gentlemen:

1. We are in the process of making up a number of taped programs which will operate on the new AstroVision Bally Arcade.
2. We are also contacting software writers to determine their interest in providing their own handiwork.

TO EXPAND

1. We have taken the most popular programs that have appeared in the ARCADIAN and made up collections under the general title of "Best Of ARCADIAN, 19xx". These will contain 5 or 10 programs each, all rewritten for the new Basic cartridge. We should have four tapes available in the Fall.

2. Writers now have only the newsletter as a place to advertise their wares amongst dedicated Arcade owners, supplying their products primarily by mail. They are interested in retail, over-the-counter, outlets. I am acting as a sort of agent for these writers in an unofficial way, to be a single point of contact, and reduce correspondence, confusion, and time.

3. A small piece of hardware, the Edge Tag, can now be supplied. The enclosed sheet describes the product and its use. The illustrated Tag is #1 and is currently available. Artwork for Tag #2 is under way - this Tag will include the names of the Astro/Vision Videocades. The retail price of these Tags is \$3.50

If you are interested in any of the above items, please drop me a line and we can continue the discussion.

Yours Very Truly,

Robert Fabris, publisher
